

main.c

Run

Output

```
1 #include <stdio.h>
2 #include <string.h>
3 int main() {
4     char user[10][20], file[10][20][20];
5     int users = 0, files[10] = {0};
6     int choice, u, i;
7     char uname[20], fname[20];
8     while (1) {
9         printf("\n--- Two Level Directory ---\n");
10        printf("1. Create User\n");
11        printf("2. Create File\n");
12        printf("3. Display Files\n");
13        printf("4. Search File\n");
14        printf("5. Exit\n");
15        printf("Enter choice: ");
16        scanf("%d", &choice);
17        if (choice == 1) {
18            printf("Enter user name: ");
19            scanf("%s", uname);
20            strcpy(user[users], uname);
21            users++;
22            printf("User created successfully.\n");
```

```
--- Two Level Directory ---
1. Create User
2. Create File
3. Display Files
4. Search File
5. Exit
Enter choice: 1
Enter user name: user1
User created successfully.

--- Two Level Directory ---
1. Create User
2. Create File
3. Display Files
4. Search File
5. Exit
Enter choice: 2
Enter user name: user1
Enter file name: file1
File created successfully.
```
